Vel Tech High Tech Dr.Rangarajan Dr.Sakunthala Engineering College

2019 - 2023 , CGPA: 7.9

Professional Summary

Results-driven Software Engineer with 2+ years of experience in building scalable, high-performance web applications using Angular (v7–19). Proven experience delivering enterprise-grade solutions for healthcare and government sectors serving 100K+ users. Skilled in developing reusable component libraries and optimizing application performance by up to 40%. Strong team player with expertise in API integrations and Agile-driven, responsive UI development.

Experience

Software Engineer, Protechsoft Technologies Pvt Ltd

June 2023 – Present

- Developed and maintained enterprise-scale Angular applications using modular, reusable UI components and scalable architecture.
- Integrated RESTful APIs, implemented performance optimizations, custom form validations, and built shared Angular libraries for cross-project reuse.
- Collaborated in Agile teams through daily stand-ups, sprint planning, and code reviews to deliver high-quality, on-time solutions.

Technologies

- Web Technologies: Angular (v7–19), React, HTML5, CSS3, JavaScript, JSON, XML ,TypeScript
- UI Libraries: PrimeNG, Custom Component Libraries, Bootstrap
- Tools: Visual Studio Code, Visual Studio, Git, TFS, SVN
- Methodologies: Agile/Scrum, Code Reviews, Performance Optimization, Test-Driven Development

Projects

CCSES (Role: Angular Developer)

- Responsibilities: Analysis and Front-End Development
- Technologies used: Angular 19, TypeScript, JavaScript, PrimeNG
- Description: Worked on the *Arkansas Health Care* project, focusing on building efficient and scalable front-end modules. Developed **custom components and reusable packages** to enhance website performance and maintainability. Implemented **responsive UI designs, form validations, exception and event handling, and service integration** to ensure a seamless user experience.

NVKids (Role: Angular Developer)

- Responsibilities: Analysis and Front-End Development
- Technologies used: Angular 7, TypeScript, JavaScript, PrimeNG, Custom Packages, Swagger API
- Description: Nevada Child support system has two websites (Customer Portal and Employer Portal) and a web application (NVKids Dashboard). Created custom components and packages to optimize performance. UI design, forms validations, exception and event handling, service invocation, and reusable frontend components.

Key Contributions:

- Developed reusable Angular components, shared libraries, and UI modules to support scalable, enterprise-level applications.
- Enhanced application performance and maintainability through code refactoring, peer code reviews, and best practices in TypeScript and Angular standards.
- Collaborated with cross-functional teams (backend, QA, business analysts) to deliver high-quality features and efficiently resolve production issues.
